

TSHEDZA LUNGELO MABASO

BCom Information Systems Student | Aspiring Data Engineer & Data Scientist

Johannesburg, Gauteng | mlungesta@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

PROFILE

University of Johannesburg BCom Information Systems student with a strong interest in data engineering, data science and technology-driven problem solving. Strongest programming areas are SQL and C#, with growing experience in Python, Excel-based data analysis, Power BI, Azure fundamentals and web development through coursework, hackathons and practical projects.

EDUCATION

University of Johannesburg - BCom in Information Systems | 2025-Present | Final year expected 2027

Selected academic strengths: Development Software, Information Systems, Data Analysis and Microsoft Excel. Awarded Advanced Information Literacy.

TECHNICAL SKILLS

- SQL and C# - proficient; Python - developing through practical projects.
- Microsoft Excel and Data Analysis - academic/applied experience at UJ; Power BI - developing.
- Microsoft Azure data fundamentals - DP-900 preparation in progress; PL-300 Power BI Data Analyst preparation in progress.
- HTML, CSS and JavaScript - beginner; GitHub and GitHub Pages - project hosting and deployment.

PROJECTS

UJ Compass - UJ DEV Society Hackathon Team Project - Co-developed a responsive student support and communication prototype with campus updates, service routing, request tracking, digital queues, accessibility features and simulated bus tracking.

Sidekick - AI Workplace Productivity Assistant - Built and tested a productivity prototype for email drafting, meeting summaries, task planning, research support and contextual quick chat, with prompt engineering and responsible-AI safeguards. [Live demo](#)

Sales Data Analysis Dashboard - Used Excel to transform sales data into monthly summaries, KPIs, charts and management-friendly trends.

Student Performance Data Analyzer - Beginner Python project using CSV data, functions, calculations, sorting and performance categories to identify student and subject trends.

CREDENTIALS & DEVELOPMENT

- 4IR Programme - University of Johannesburg - completed.
- Advanced Information Literacy - University of Johannesburg - awarded.
- Microsoft DP-900 Azure Data Fundamentals - exam scheduled; target completion by end of September 2026.
- Microsoft PL-300 Power BI Data Analyst - exam scheduled; target completion by end of September 2026.

COMMUNITY INVOLVEMENT

- Volunteer Grade 10 Mathematics Tutor - supported learners during university recess.
- Volunteer University Application Mentor - continue helping matric learners navigate university applications and requirements.

STRENGTHS

- Problem-solving, critical thinking, teamwork, communication, attention to detail, self-motivation and willingness to learn.
